SECTION 4 - FIRST AID MEASURES (CONT.)

Other Specific Instructions: In the event of exposure, seek medical attention immediately. Do not give chemical antidotes unless directed by the physician.

SECTION 5 - FIRE FIGHTING MEASURES

Flash Point: Not applicable

Auto Ignition: No data available

Explosive Limits; UEL/LEL: In sufficient concentrations, dusts can form explosive mixtures with air.

Extinguishing Agents: Use water spray, dry chemical, carbon dioxide, or foam extinguishing agents. Do not apply a direct water stream on material.

Fire & Explosion Hazards: As in any fire, prevent human exposure to fire, smoke, fumes or products of combustion. Firefighters should wear recommended exposure control equipment including a self-contained breathing apparatus. Cool containers with water that are exposed to flames. Avoid placing a solid stream of water on spilled material. Bond and ground containers when transferring to prevent static build up.

Hazardous Combustion Products: Thermal decomposition produces oxides of sulfur and carbon.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal Protective Equipment: Appropriate protective equipment must be worn when handling a spill of **NAXONATE® ST**. See Section 8 - Exposure Control, for recommendations.

Spill or Leak Information: Sweep or scoop material into containers for recovery or disposal. Avoid breathing or generating dusts. Flush spill area with plenty of water. Collect water for proper disposal.

SECTION 7 - HANDLING AND STORAGE

Handling Conditions: Emptied container may retain product residues. Follow all warnings and precautions even after container is emptied. Ground and bond containers when transferring this material.

Storage Conditions: Store covered in a dry, well ventilated area. Keep container tightly closed when not in use.

SECTION 8 - EXPOSURE CONTROL

Exposure Limits: None Established

Eye Protection: Use chemical safety goggles.

Skin Protection: Skin contact with material should be minimized through the use of suitable impervious gloves. Natural rubber or neoprene gloves are recommended.

Respiratory Protection: Not required under normal handling conditions. If dusts can be generated, wear a NIOSH/MSHA approved dust/mist respirator for the dust concentrations at the point of use.

Ventilation: Good local exhaust ventilation should be provided.
