NAXONATE® SX

Product Information Sheet

SODIUM XYLENE SULFONATE - Powder

Description: NEASE CORPORATION has been a leader in hydrotropes for more than 40 years. NAXONATE hydrotropes are a proven answer to solubility problems in a wide variety of commercial applications. Optimum hydrotrope selection can result in enhanced system performance. NAXONATE hydrotrope products generate essentially no foam and no wetting action and have minimal influence on surface tension. What they offer is a cost-effective way to solubilize complex formulas, elevate cloud points and control viscosity.

CAS #
1300-72-7

NAXONATE SX is a high activity hydrotrope supplied as a free flowing powder for applications involving dry blending, etc. It is a versatile hydrotrope which can function as a solubilizer, coupling agent and processing agent in a wide range of detergent manufacture and many other industrial processes. Broad formulation compatibility and effectiveness.

Typical Properties:	Specific Gravity @ 25°C	0.56 – 0.61 g/ml
	Melting Point, °C	>300
	Molecular weight	208
	Solubility in Water	Complete

Product Specifications:	Property	Specification
	Appearance	White to Cream Colored Powder
	Active, %	93.0 minimum
	Ethanol Insolubles, %	5.0 maximum
	Water, %	3.0 maximum
	pH	7.0 – 9.0

Applications: Industrial Cleaners, Textile Dye Manufacture, Photographic Chemicals and Printing Applications

Storage and Handling: Store covered in a dry, well ventilated area. Keep container tightly closed when not in use.

Availability: 50 pound bags , 200 pound fiber drums

Chemical Control Law Status: All components of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

Transport Regulations

Shipping Description: DOT Non-Regulated
Hazard Class: NA ID Number: NA Packing Group: NA Label: None
